

## Information for WIS Sample analysis

### General info for defect samples

- Preferred sample size is A4, defect in middle
- Apply a number on each sample
- Mark the location of the defect on the edge of the sample sheet (both CD and MD) with short arrows, mark web direction and Top/bottom (picture 1 below)
- Write defect name/type on the sample sheet or prepare a separate list with sample number and name/type (picture 2 below)
- Fill in the return address, if samples should be returned

## Customer Data

Company:
